

CVP Mats

Features

- Reliable switching principle
- Choice of popular sizes
- Low profile
- Easily installed

CVP mats are light-weight, durable control mats that are designed for commercial and domestic applications. They provide a low cost solution to a range of control and signalling problems which require a low profile and maximum durability. They can be concealed under carpeting or matting making them ideal for intruder alarms and entrance annunciators. CVP mats are available in a range of popular sizes to suit most application requirements.

Technical Specification

| | |
|--------------------------------------|-------------------------------------|
| Actuation force | 20N (2kg) |
| Material | PVC |
| Colour | Green |
| Mat depth | 5mm |
| Ingress protection | IP65 |
| Operating temperature | 0 C to +50 C |
| Weight | 250g (CVP623) up to 1600g (CVP3032) |
| Maximum recommended voltage | 30V d.c. |
| Maximum switching current @ 30V d.c. | 1A |

Dimensions

| | |
|----------|---------------|
| CVP 623 | 585mm x 152mm |
| CVP 1723 | 585mm x 432mm |
| CVP 2335 | 889mm x 585mm |
| CVP 3032 | 813mm x 762mm |

Typical Applications

- Entrance annunciator
- Intruder alarm
- Foyer lighting control
- Elevator call systems
- Pedestrian counting
